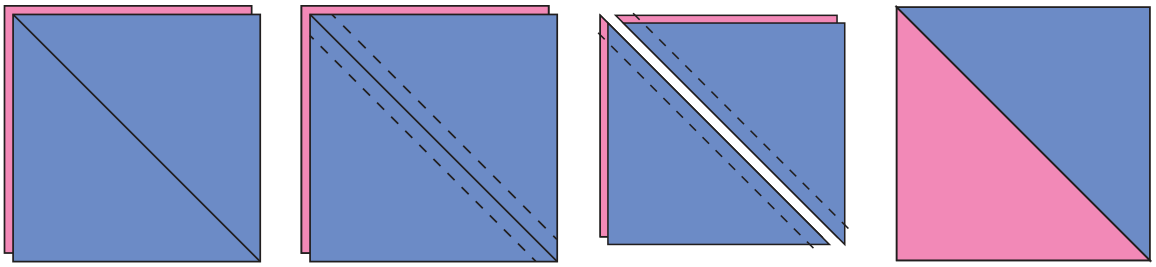
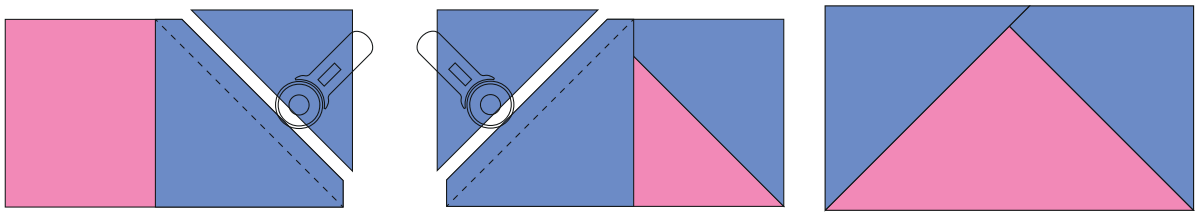
HALF SQUARE TRIANGLE

With the lighter fabric on top, right sides together, layer the fabric squares needed for the half-square-triangle. Draw a line from coner to corner on the lighter square. Stitch a scant ¼" from both sides of the line. Cut apart on the marked line. Press towards the darker fabric. Each pair of squares will yield two identical half square triangle units. Trim squares to specified half square triangle size.



STITCH AND FLIP

(Do this technique on all boxes that have an * to create triangle)


Align a square on a corner of a larger square, a rectangle or a pieced unit as directed in the block instructions. From corner to corner mark a diagonal line on this square and make sure you place it slanting in the correct direction. Sew on the marked line. Trim the seam allowances to ¼" as shown. Flip the resulting triangle open and press.
